AMENDMENTS TO THE SPECIFICATION

Please amend the specification as follows:

Please replace the paragraph on page 14, beginning at line 21 with the following amended paragraph:

An example framing mark 70 is shown in Figure 3. The framing mark can be any mark known in the art. The framing mark can be either visible or invisible as long as the frame detectors 35 and 36 can detect it. Preferably, the framing mark is printed when the graphics G1-Gn are printed on the sheet material 41, i.e., the framing mark is printed on the sheet material 41 together with the graphics G1-Gn.
